2015 American Community Survey 1-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

	Washington		Kitsap County, Washington		Snohomish County, Washington
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate
Total:	2,728,573	+/-8,477	98,490	+/-2,088	284,176
Utility gas	947,344	+/-12,139	26,652	+/-2,035	116,495
Bottled, tank, or LP gas	83,835	+/-4,012	7,669	+/-1,333	12,867
Electricity	1,502,485	+/-12,915	52,950	+/-2,333	140,193
Fuel oil, kerosene, etc.	54,294	+/-3,307	3,381	+/-728	2,725
Coal or coke	510	+/-516	0	+/-195	49
Wood	109,150	+/-4,750	6,464	+/-1,261	9,043
Solar energy	985	+/-403	68	+/-112	218
Other fuel	16,980	+/-2,166	918	+/-416	1,618
No fuel used	12,990	+/-1,778	388	+/-254	968

	Snohomish County, Washington
	Margin of Error
Total:	+/-2,692
Utility gas	+/-3,545
Bottled, tank, or LP gas	+/-1,810
Electricity	+/-4,572
Fuel oil, kerosene, etc.	+/-833
Coal or coke	+/-84
Wood	+/-1,298
Solar energy	+/-206
Other fuel	+/-572
No fuel used	+/-462

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-1' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+1' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
